Native Animal & Wildlife Program

INTRODUCTION
TO OUR NATIVE
ANIMALS

Discover some of our amazing
wildlife whilst learning how to
protect them.
Even in your own backyard!

Over the course of the sessions, we'll dive into a new class of animals each week, where participants will uncover some pretty incredible facts!

We'll also chat about the important role these animals play in the environment and discover simple ways we can help protect local wildlife, even in our own backyards.

Each session is filled with fun! Expect visual aids, hands-on activities, and the chance to meet some of our animal friends up close.

It's all about creating a safe, fun, and inclusive space where everyone can learn and explore together!

Details

Topics can include: Insects, Snakes, Lizards, Turtles, Frogs, Marsupials and Plants plus more..

Weekly Program Outline

INTRODUCTION TO THE SPECIES OF THE WEEK

At the start of each week, we'll gather together to say hello, check in, and introduce the exciting species we'll be learning about!

VISUAL PRESENTATION AND EDUCATIONAL TALK

Using fun visuals, sounds, and videos, we'll dive into the world of the species of the week. Get ready to explore through pictures, recordings, and some lively discussions!

INTERACTIVE ACTIVITIES

Each session has a range of interactive activities. These include science experiments and art and craft creations

MEET OUR FRIENDS

Some of our special animal friends (related to the week's topic) will stop by to say hello, giving participants the chance to see them up close.

RECAP

We'll wrap things up with a quick Q&A session and finish off any remaining activities.

FINISH

See you next week for more fun & learning!
