Program

We will arrive 30 minutes prior to set up. We will need 1 table positioned at the front of the class. If including activities, we will require another couple of tables placed around the room.

Topics can include:

Birds
Insects
Frogs
Snakes
Lizards
Our backyard
Possums

Subjects covered can include: Habitats and Ecosystems, Life Cycles, Adapting to an Environment, Body Structure, Food! What do they eat, Native plants plus much more...

If there is a subject you would like us to cover, please let us know.

“Our challenge isn’t so much to teach children about the natural world, but to find ways to sustain the instinctive connections they already carry.”

~ Terry Krautwurst

Cost

Presentation only

As presentations can be tailored to individual needs, prices will be advised on application

Presentation with activities

1 hour session - POA
2 x 1 hour sessions - POA

All presentations includes an information pack for each child.

Activities

Activities can vary, so please ask about our range of options and let us know of any requirements you have.

Our Presentation

30-60 MINUTE PRESENTATIONS

Our children's presentations can be tailored to your needs. We can adapt the duration and content to the age of the children. Our presentations have been designed to compliment the early years learning framework.

Our Vision

Children are mesmerised when they see animals up close, so its our job to nurture that fascination and provide children an opportunity to learn and explore the wonderful world of nature!

Our aim is to provide a fun and informative presentation which not only engages the children but also provides them information that they can take home and use to so they can help protect local wildlife in their own backyard!
